PENDULUM

ticler | Software

Stay current on important dates and deadlines with Pendulum's ticler[©] software. This electronic tickler system can help your organization store and track time-sensitive information, such as certificates of insurance for vendors, contracts, equipment maintenance, credentialing, and employee training, all in one place.

The ticler system has two primary functions. First, it provides a centralized location to store your organization's information. Additionally, it informs you when tracked items are about to expire through an on-screen reminder-the ticler Assistant.

The ticler software is divided into five sections for easy data entry. It can track all of the following for your facility:

- Certificates of insurance for vendors
- Your organization's contracted services
- Required maintenance for facility equipment
- The appropriate credentials required for physicians and allied healthcare providers
- Employee training classes needed—including scheduling—and completion of the classes

The system is a user friendly way to keep records up to date. Your facility can generate real-time reports as data is entered for use by staff. Users are also able to store copies of documents in the system.

Request a Demo

You can request a demonstration of ticler by contacting Pendulum. We will schedule an online meeting with you to review the many features of the program. You will be able to view and analyze our sample data that has been entered into the program.

For more information about the Pendulum ticler software, contact us by phone at (888) 815-8250, by email at ticler@WeArePendulum.com, or visit our website at www.WeArePendulum.com.

System Requirements

Hardware

- Intel/AMD/or compatible CPU running at 1GHz or faster
- 256 MB RAM
- Z Display Resolution of 800x600 or greater, although 1024x768 or greater is recommended

Operating System

- Microsoft[®] Windows[®] XP Microsoft[®] Windows[®] Vista Microsoft[®] Windows[®] 7

Additional Software Microsoft.NET Framework 3.5 SP1 or higher С

Database Sharing \leq Is not supported with this program
