

# Pendulum ticler™

## What is Pendulum ticler™?

Pendulum ticler is an electronic tickler system that can help your organization stay current with time-sensitive information, such as Certificates of Insurance for vendors, Contracts, Equipment Maintenance, Credentialing, and Employee Training. It is intended to provide two primary functions: The first is a centralized location to store your organization's time-sensitive information, and the second is to inform you when tracked items are about to expire.

The ticler Assistant is an onscreen reminder that provides notification of documents approaching expiration.

The five main sections of ticler are:

- Certificates of Insurance: Tracks Certificates of Insurance for vendors
- Contracts: Maintains a list of your organization's contracted services
- Equipment: Tracks required maintenance for facility equipment
- Credentialing: Tracks the appropriate credentials required for physicians and allied health care providers
- Training: Intended to track classes—including scheduling—and completion of the classes

## Request a Demo

You can request a demonstration of ticler by contacting Pendulum. We will schedule an online meeting with you to review the many features of the program. You will be able to view and analyze our sample data that has been entered into the program.

## Contact Pendulum

Contact us by phone at (888) 815-8250, by email at [ticler@WeArePendulum.com](mailto:ticler@WeArePendulum.com) or visit our Web site at [www.WeArePendulum.com](http://www.WeArePendulum.com).

## Key Features

- User friendly
- Divided into five main sections for easy data entry
- Assists facilities with keeping up-to-date records
- ticler Assistant notifies you when a document is approaching expiration
- Generates real time reports as data is entered for use by staff
- Allows user to store actual copies of documents

## System Requirements

### Hardware

- Intel/AMD/or compatible CPU running at 1GHz or faster
- 256 MB RAM
- Display Resolution of 800x600 or greater, although 1024x768 or greater is recommended

### Operating System

- Microsoft® Windows® XP
- Microsoft® Windows® Vista

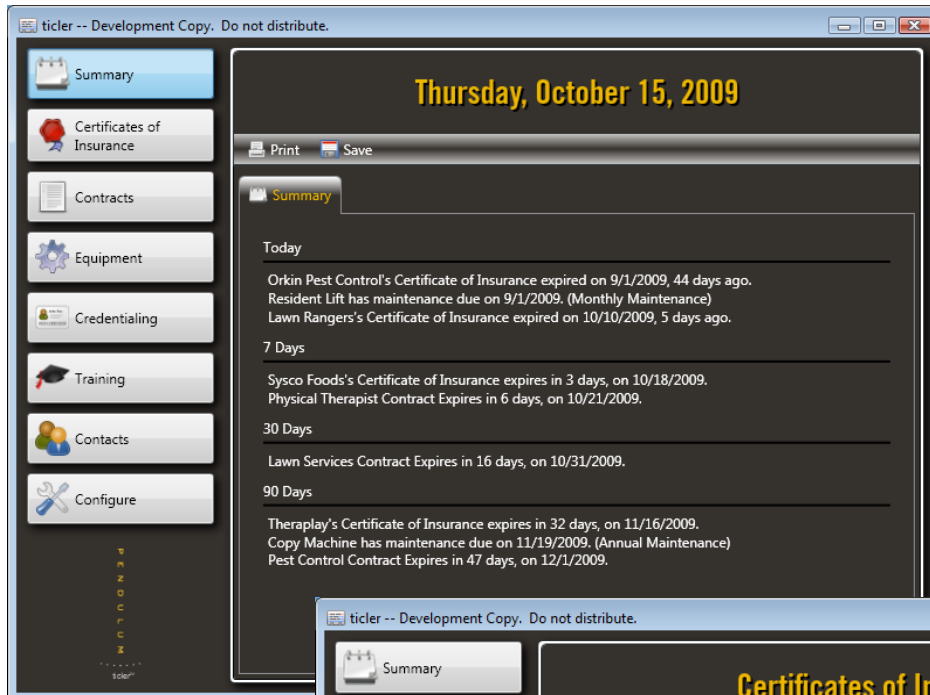

### Additional Software

- Microsoft.NET Framework 3.5 SP1 or higher

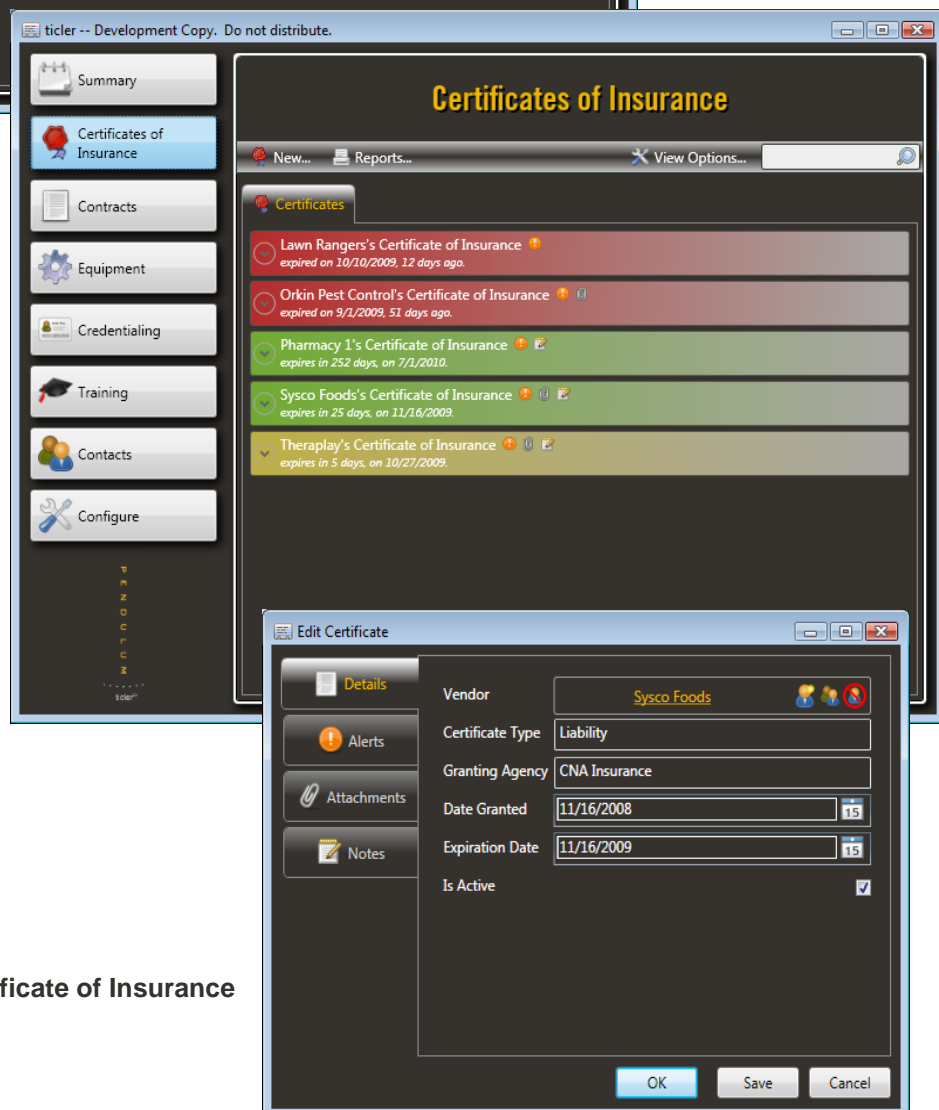

### Database Sharing

- Is not supported with this program
