

PENDULUM

Abuse Prevention and Management Module

Managing risk in your facility starts with preparing your staff to provide the best possible care. Pendulum's Information and Training Modules are designed to educate all levels of facility staff in managing key high-risk areas. The modules are geared toward the skilled nursing or assisted living environments, or a combination of both; however, the abuse module is applicable to any setting providing services to the elderly and or mentally ill. A thorough presentation, discussion questions, and sample resources are provided with each module.

■ What's in this Module?

Learn how to identify potential abuse risk factors, minimize abuse, and manage alleged abuse with Pendulum's Abuse Prevention and Management Module. The techniques needed to implement effective abuse management strategies are provided in this module through:

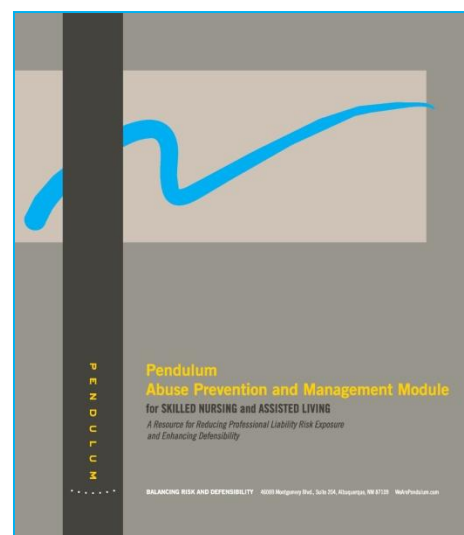

- An in-service training program
- Guidelines on best practices in abuse prevention and resident rights
- Sample policies and procedures
- Two DVDs: InService Monthly's *Resident Rights* and *Caring for Residents with Dignity and Respect*

The Abuse Prevention and Management Module also comes with a CD containing the contents of the module, including the training program in PowerPoint format.
