

Armed Intruder and Active Shooter in the Healthcare Facility

It can—and has—happened. An armed intruder finds his way into your facility. Now what?

The Pendulum Armed Intruder and Active Shooter Program allows your facility to:

- Understand a state of preparedness. Is your facility ready for an unforeseen emergency—environmental, accidental, or hostile? Does your Emergency Operations Plan cover all it needs to cover?
- Define terminology and concepts specific to a hostile act within your facility—specifically, a *focused and limited hostile event* or a *broad, facility-wide hostile event*. Understand how one type of incident can morph into another
- Review a case study and discuss the unforeseen challenges that the event can generate, adversely affecting the care and health of stakeholders, performance of staff, and operational state of the facility
- Learn how your staff can protect themselves during the commission of a hostile active event within the facility by utilizing “The Four Outs” of the Active Shooter Safety Action Plan
- Understand the increased stress and anxieties that come hand-in-hand with an active hostile event and how to control those anxieties and stress through thorough preparation and training
- Understand the critical decision-making process and psychology behind the program. Refine decision-making skills in order to increase the likelihood of survival of staff and other stakeholders during an active hostile event
- Learn the S.T.A.F. Protocol, balancing the safety of all stakeholders during an active shooter event within your facility
- Remain safe and alive during an active hostile event

The Armed Intruder and Active Shooter Program is presented by the Pendulum Crisis Management Team. The team is composed of the members of EM Alliance, a partnership formed by leaders in risk management, fire and life safety, security administration, and disaster recovery to provide the healthcare community the tools and services needed for disaster planning, response, mitigation, and recovery.
